

OREGON

A LEADER IN MASS TIMBER INNOVATION

With access to large quantities of high quality softwood, Oregon is one of the leading wood products suppliers in the U.S. Advanced technologies and new products are changing the industry landscape and Oregon is poised to be a leading innovator at the global scale.

Oregon is a resource for deep expertise in forestry, wood-based materials, engineering and architecture that is driving innovation across the entire advanced wood products supply chain, from forest to frame.

Unparalleled
Industry Resources

Oregon's Key Resources for Mass Timber Development

Business Oregon

<https://www.oregon4biz.com>

The Oregon Business Development Department (Business Oregon), invests in business development and infrastructure projects throughout the state of Oregon. The Business Oregon recruitment team helps companies looking to relocate or expand.

Oregon Forest Resources Institute

<https://www.oregonforests.org>

In 1991, the Oregon Legislature created the Oregon Forest Resources Institute (OFRI) to enhance collaboration among forest scientists, public agencies, community organizations, conservation groups and forest landowners.

Oregon Manufacturing Extension Partnership

<https://www.omep.org>

OMEP exists to help Oregon manufacturers respond to the challenges of competing in an increasingly global economy. We work with owners, executives, managers and operators to assess company needs in all areas. We evaluate key opportunities, isolate obstacles to growth, and move quickly into implementation to ensure immediate return on efforts.

TallWood Design Institute

<http://tallwoodinstitute.org>

A partnership between Oregon State University's College of Forestry and College of Engineering, and the University of Oregon's College of Design, the TallWood Design Institute (TDI) is the nation's leading research collaborative focused on the advancement of structural wood products and mass timber design.

VertueLab

<https://vertuelab.org>

VertueLab merges innovation, technology, entrepreneurship, and impact investing to address and resolve global environmental challenges. We are the conduit between promising cleantech companies and the investors who empower their progress through support and access to capital.

Western Wood Products Association (WWPA)

<https://www.wwpa.org>

Supported by Western lumber manufacturers, WWPA delivers lumber grading, quality control, technical, business information and product support services to sawmills as well as those who use Western softwood lumber products throughout the world.

WoodWorks – Wood Products Council

<http://www.woodworks.org>

WoodWorks provides free technical support as well as education and resources related to the code-compliant design of non-residential and multi-family wood buildings.

World Forestry Center

<https://www.worldforestry.org>

Founded in 1966, the World Forestry Center (WFC) is a nonprofit organization dedicated to creating and inspiring champions of sustainable forestry. Based in Portland, Oregon, the WFC provides critical programs in convening and professional development of global leaders and practitioners in forestry and related fields.
